

Dear Prospective Customer,

I had a website for our parish that had gone unattended for some time, nearly one year. Being on a tight budget and looking for people to volunteer to maintain the website was difficult. I was struggling about what to do.

My parish council Vice-President heard about Whole Wheat Web Design and thought I should call Shannon. I compared her work with other webmasters and felt she could do what I needed done. My primary objective was to update my bulletins on a weekly basis so that the information was current and available to others.

Shannon is patient and flexible. She helped me wade through cyberspace problems very professionally with our existing parish website. (It may be difficult to convince some parishioners to provide information). It was located on 2 different servers. She was helpful in transferring our domain registration to another company. She was often available by phone when I initially needed to discuss matters. The parish site is gradually being updated as traditionally-minded parishioners catch on to the internet.

That was only the beginning.....

Soon I had Shannon secure another domain for a special fundraising project called PACE (www.paceyourself.ca) . All the material I sent her was either a jpeg graphic I created myself or information she could present on the site more tastefully.

The three most important and outstanding ways Shannon has assisted and blessed our website and our parish as a result is through her dependability and promptness and price. The frequent updates that I requested were loaded up usually within 24 hours (often sooner than that) at half the price of other webmaster rates I researched and she did it right the first time.

Whole Wheat Web Design (Shannon) has given me peace of mind. . . and succeeded my expectations. I am proud to invited people to visit our webpages.
